Dear Sir/Madam

I have recently completed my extended diploma in games development at Greater Brighton Metropolitan College and I would be a great fit as a part of your development team in Brighton as a Game Programmer.

Over my years learning games development I have experimented with many different platforms ranging from Browser games to Virtual Reality games. Throughout those years I have released a couple of games on different platforms covering from Scirra Arcade, Itch.io, Gamejolt and the Google Play store these all have mainly been C# projects, however, I have also experience in visual scripting and an understanding of C++. With these projects, I have also learnt a variant of different packages such as Photoshop, Maya, Blender and MagicaVoxel, which have helped me make different styles of games.

I am confident that my experience and skill set will benefit you as a part of your team working on different projects. You can contact me at [benwilson2508@gmail.com](mailto:benwilson2508@gmail.com) or 07484621617 and I will be looking forward to hearing from you soon.

Sincerely,  
Ben Wilson
